

URANO

SURVEY BOAT

MARINE SERVICES PROVIDER
SINCE 2011.

URANO

SURVEY BOAT

URANO is a small survey boat specifically designed and equipped for coastal, internal and confined water survey.

The very low draught and the waterjet propulsion allow the work in very shallow water, the hull design also offer a great stability for accurate data acquisition.

The boat is road-towable for rapid and cost-effective mobilization and offer a long endurance operation capability.

The boat is equipped to perform geophysical survey, environmental survey, water and seabed sampling and ROV deployment.

LIST OF EQUIPMENT

FOG Gyro with attitude sensor
Data acquisition and positioning computer
Positioning system: DGPS, Applanix, Hemisphere
MBES
Sidescan Sonar
Sub Bottom Profiler
Magnetometer
Water and seabed sampling equipment
ROV with subsea positioning

SPECIFICATIONS
